BUILDING FACADES IN INDUSTRIAL ZONES

BUILDING FACADES IN INDUSTRIAL ZONES

Objective:

To ensure the industrial building facade facing a public street is constructed to a high standard to improve the overall amenity of industrial areas within the district.

Policy Statement

The front facades of any new building or a refurbished building in all industrial zones throughout the City shall be designed to enhance the visual appearance of the building from the street. A combination of building materials is encouraged, however the use of metal sheeting on the front façade should not be the substantial material used.
