Petition to the City of Albany Councillors and CEO

Save critical Yakamia wildlife habitat from destruction

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors vote against the recommendation for OCM agenda item CCS438 – Proposed Road Reserve – Lot 4743, 102 North Road, Yakamia.

This high-quality native bushland provides vital habitat for the critically-endangered Western Ringtail Possum, endangered species of Black Cockatoo and countless birds, insects and reptiles.

We do not want any part of this lot, which the City of Albany owns on behalf of Albany ratepayers, to be destroyed.

We request that the City of Albany negotiates with Martin Shuttleworth of Archimedes Pty Ltd to buy Lot 420, 58 Sydney Street, Yakamia, and protect it as a wildlife reserve which must not be destroyed. This land can be used by the City of Albany to offset carbon emissions from ongoing road building and other projects.

All of this bushland habitat connects to the Yakamia Creek and is too important to lose.
