Council Policy - CEO Performance Review Process

1. Policy Statement

(a) Rationale

This process is documented and adopted by Council to ensure a consistent approach to the City of Albany CEO review.

The review process must be a collaborative, constructive process that is designed to enhance performance and provide guidance for the ensuing twelve months, using the City's agreed Strategic Plan and/or Business Plan.

Councillors must be prepared to take a corporate view of this process. The performance review process should be regarded as an opportunity to build relationships and to increase the effectiveness of individuals, systems and processes which will improve the performance and the profile of the City of Albany.

Councillors participating in the review process must:

- Show an ability to be fair and objective
- Use good communication skills
- Possess preparation and evaluation skills
- Avoid Bias
- Be able to concentrate on outcomes
- Provide negotiation skills

(b) Briefing session

It is essential to gain input from all Councillors into the review and appraisal process. A briefing session will be organised to cover the performance appraisal, the procedures followed, keeping in mind current progress of the Strategic Plan and the skills required of the panel members; an independent person with relevant skills will be brought in to facilitate the session.

(c) Contract

- The CEO contract must contain the City's dispute resolution policy for both parties.
- The City's agreed CEO review procedure shall be contained within the CEO contract.

Town Planning Scheme No. 3– Application: P2130479 Proposal: Extractive Industry (sand) Schedule of Submissions for 84 Prideaux Road, Lower King WA 6330

| 1 | That trucks will have a negative impact on the amenity on the area and potentially conflict with other road users. Noise pollution – noise from the site will carry to all the neighbouring properties. The proposed operational hours are not congruent to family life. | Concerns noted. It is considered that the number of trucks movements a day which have been proposed (10) is minimal. Officers recommend a condition be applied requiring the proponent to rectify any undue damage to the road network. Secondly, due to the intermittent demand for sand resources, it is unlikely that the site would be in constant use. All operations on site are to be in accordance with the <i>Environmental Protection (Noise) Regulations 1997</i>. All statutory buffers are met. Officers have identified the potential to remove Saturday as an allowable work day. | | | | | |
| 2 | The suitability of the surrounding road network and the impact trucks will have on the surrounding amenity. The potential for traffic issues with residents living on Predeaux rd. The number of trucks which is being used is misleading. Truck movement will affect property values. | Officers recommend a condition be applied requiring the proponent to rectify any undue damage to the road network. All operations on site are required to be in accordance with the <i>Environmental Protection (Noise) Regulations 1997</i>. The application has been referred and advertised to landowners in accordance with the City of Albany | | | | | |

A vehicle movement include both the outward and return trip. 4. Property values cannot be considered as part of the assessment of a planning application. | | | | | | |
| 3 | That trucks will have a negative impact on the amenity on the area and the potentially conflict with other road users. Potential conflict with School buses. Noise pollution. Air pollution – The increase in heavy transport and the addition of site machinery will add, at the very least, additional dust, fumes and sand particles into the surrounding air. Infrastructure deteriorate will occur due to the road not being of a suitable standard for trucks. Property values will be adversely affected. Vistas and Environmental Impact – Although the site may be hidden from the road, there are some homeowners that will be able to see the landscape change from farmland to an industrial site from their properties. Location of access tract will further cause amenity impacts. The permitted hours of operation are outside of business hours and conflict with the surrounding land uses. | Concerns noted. All operations on site are required to be in accordance with the Environmental Protection (Noise) Regulations 1997. It has been recommended that the proponent establish a dialogue with school bus operators to ensure that trucks do not operate when the school bus is in the vicinity of the pit. Concerns regarding noise pollution are noted. All operations on site are required to be in accordance with the Environmental Protection (Noise) Regulations 1997. The proponent has also agreed to move the location of the internal access track further to the north. The issue of air pollution is noted. As mentioned previously, the proponent has also agreed to move the location of the internal access track further to the north. A number of conditions are recommended | | | | | | |

| | | Officers recommend a condition be applied requiring the proponent to rectify any undue damage to the road network. |
| | | Property values cannot be considered as part of the assessment of a planning application. |
| | | Concerns regarding vistas and environmental impacts are noted. The proposed setbacks meet all applicable statutory requirements at a local and State level. |
| | | The proponent has also agreed to move the location of the internal access track further to the north in order to mitigate potential amenity concerns. |
| | | Officers have identified the potential to remove Saturday as an allowable work day within the report item. |
