9. PETI	TION
---------	------

Albany Customer Service Item Receipt
Date: 16/6/2017 Time: 10:40 AM/PM No 09936
Customer: Melissa Wolke
Description: <u>Petition for Greg Stocks</u>
Deliver to REC Cr Greg Stacks Customer Service Officer: NS

To whom it may concern,

Over a period of three months I have collected signature from members of the public as well as visitors to the city to show that there is a great demand for more shade over our public playgrounds.

I have received an overwhelming amount of support from the public and also the Cancer council of western Australia, their letter or support is enclosed. In it they have outlined the importance of sun safety and the dangers of uv radiation . I know the parents of Albany appreciate the wonderful playgrounds we have in the area but there is a serious lack of shade over the play equipment itself. UV radiation isn't effected by the outside temperature and is often high when you wouldn't expect it to be. Apart from the sun damage to our bodies there has also been cases of children being physically burnt from the play equipment itself.

I'm not suggesting this is an overnight fix but I believe a gradual roll out is possible of either shade sails over selected playground and or trees strategically planted to provide shade over the play equipment rather than the car park which is the case at foundation park.

Thank you for reading, I hope you take all this into consideration.

Kind regards

Melissa Wolfe

REDACTED

9. PETITION

3rd March 2017

Melissa Wolfe

PO Box 5129

Albany WA 6332

Dear Ms Wolfe,

Re: Playground shade in Albany parks

Thank you for contacting Cancer Council WA regarding your concerns about the lack of shade over the playgrounds located in parks in the Albany district. As I understand the situation, City of Albany has advised that shade is not required here because of the low temperatures experienced in the region. As you are aware, the major cause of skin cancer in our community is ultraviolet (UV) radiation, a recognised class one carcinogen, which cannot be felt or seen. Temperature does not affect the UV radiation level, and it is possible to have damaging levels of UV radiation even when the weather is cool or cold.

Almost all skin cancer is caused by overexposure to UV radiation from the sun. Australia, in particular WA, experiences some of the highest levels of UV radiation in the world. We recommend the use of sun protection when the UV level reaches 3 or higher. Previous research has shown that UV level in Albany can reach as high as 12 during the summer months. Even during March when the temperatures start dropping, the UV level can still reach as high as 8 in Albany. Two in three Australians will develop skin cancer before the age of 70, and it results in more deaths annually than the nation's road toll. Adolescence and childhood are critical periods during which exposure to UV radiation is more likely to contribute to skin cancer in later life. Furthermore in adolescent Australians melanoma is now the most common cancer.

If the description of no shade over the playgrounds in the parks located in the Albany district is accurate, Cancer Council WA shares your concern that the lack of shade at the playground will result in overexposure to the sun and an increased risk of skin cancer for children and parents using these playgrounds. We wish to express our support for you in your effort to advocate for some form of shade at these sites. Shade is an important component in the design and creation of safe and healthy communities and we hope that City of Albany will reconsider the need for shade in these sites.

The classification of solar radiation as a class one carcinogen by the International Agency for Research on Cancer (IARC) is an important consideration for providers of outdoor facilities such as playgrounds. Cancer Council WA recommends individuals protect themselves from the risk of skin cancer in five ways. We ask people to use long clothing, a hat, sunglasses and sunscreen. We also

recommend they seek shade. This is not something that people can easily provide for themselves when accessing public spaces. We acknowledge the cost and maintenance involved with shade provision however it is essential to providing a safe and healthy community environment for ratepayers and their children.

Yours sincerely

M. Shell
