**Petition to the City of Albany Councillors, CEO and Staff**

**Amend Yakamia/Lange Structure Plan to preserve vital wildlife habitat and carbon-absorbing native vegetation**

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors, CEO and staff enact the following:-

1. Amend the Yakamia / Lange Structure Plan to re-zone as much bushland as possible on Lot 4743, 102 North Road, Yakamia, particularly the northern one third portion, from 'Future Urban Residential' to '**Environmental Conservation Reserve**'.

**Reasons:** To preserve rare and threatened wildlife species which inhabit this area, particularly critically-endangered Western Ring Tail Possums and endangered Black Cockatoos. To allow Yakamia and other Albany residents to continue to use this bushland for passive recreation purposes.

2. Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.

3. Abide by the intent, objectives and actions outlined in the adopted City of Albany Local Planning Strategy 2019 which places a heavy emphasis on the need for conservation of native vegetation when addressing land use matters within the City of Albany, including Action 5 under Urban Growth which states:

**'There is a presumption against clearing for urban development.'**

4. Comply with the City's Climate Change Action Declaration to reduce carbon emissions by preserving carbon-absorbing bushland on Lot 4743 which may be able to be used to offset the City's ongoing carbon emissions from projects such as road building.

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors, CEO and staff enact the following:-

1. Amend the Yakamia / Lange Structure Plan to re-zone as much bushland as possible on Lot 4743, 102 North Road, Yakamia, particularly the northern one third portion, from 'Future Urban Residential' to '**Environmental Conservation Reserve**'.  
**Reasons:** To preserve rare and threatened wildlife species which inhabit this area, particularly critically-endangered Western Ring Tail Possums and endangered Black Cockatoos. To allow Yakamia and other Albany residents to continue to use this bushland for passive recreation purposes.
2. Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.
3. Abide by the intent, objectives and actions outlined in the adopted City of Albany Local Planning Strategy 2019 which places a heavy emphasis on the need for conservation of native vegetation when addressing land use matters within the City of Albany, including Action 5 under Urban Growth which states:  
**'There is a presumption against clearing for urban development.'**
4. Comply with the City's Climate Change Action Declaration to reduce carbon emissions by preserving carbon-absorbing bushland on Lot 4743 which may be able to be used to offset the City's ongoing carbon emissions from projects such as road building.

Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.

3. Abide by the intent, objectives and actions outlined in the adopted City of Albany Local Planning Strategy 2019 which places a heavy emphasis on the need for conservation of native vegetation when addressing land use matters within the City of Albany, including Action 5 under Urban Growth which states:

**'There is a presumption against clearing for urban development.'**

4. Comply with the City's Climate Change Action Declaration to reduce carbon emissions by preserving carbon-absorbing bushland on Lot 4743 which may be able to be used to offset the City's ongoing carbon emissions from projects such as road building.

## Petition to the City of Albany Councillors, CEO and Staff

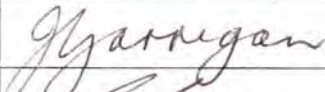

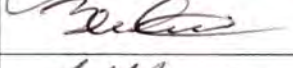

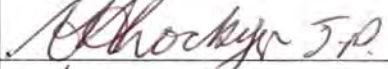

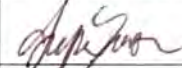

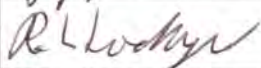

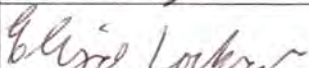

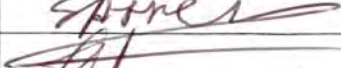

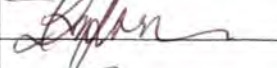

### Amend Yakamia/Lange Structure Plan to preserve vital wildlife habitat and carbon-absorbing native vegetation

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors, CEO and staff enact the following:-

1. Amend the Yakamia / Lange Structure Plan to re-zone as much bushland as possible on Lot 4743, 102 North Road, Yakamia, particularly the northern one third portion, from 'Future Urban Residential' to '**Environmental Conservation Reserve**'.

**Reasons:** To preserve rare and threatened wildlife species which inhabit this area, particularly critically-endangered Western Ring Tail Possums and endangered Black Cockatoos. To allow Yakamia and other Albany residents to continue to use this bushland for passive recreation purposes.

2. Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.

**Petition to the City of Albany Councillors, CEO and Staff**

**Amend Yakamia/Lange Structure Plan to preserve vital wildlife habitat and carbon-absorbing native vegetation**

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors, CEO and staff enact the following:-

- Amend the Yakamia / Lange Structure Plan to re-zone as much bushland as possible on Lot 4743, 102 North Road, Yakamia, particularly the northern one third portion, from 'Future Urban Residential' to '**Environmental Conservation Reserve**'.  
**Reasons:** To preserve rare and threatened wildlife species which inhabit this area, particularly critically-endangered Western Ring Tail Possums and endangered Black Cockatoos. To allow Yakamia and other Albany residents to continue to use this bushland for passive recreation purposes.
- Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.
- Abide by the intent, objectives and actions outlined in the adopted City of Albany Local Planning Strategy 2019 which places a heavy emphasis on the need for conservation of native vegetation when addressing land use matters within the City of Albany, including Action 5 under Urban Growth which states:  
**'There is a presumption against clearing for urban development.'**
- Comply with the City's Climate Change Action Declaration to reduce carbon emissions by preserving carbon-absorbing bushland on Lot 4743 which may be able to be used to offset the City's ongoing carbon emissions from projects such as road building.

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors, CEO and staff enact the following:-

- Amend the Yakamia / Lange Structure Plan to re-zone as much bushland as possible on Lot 4743, 102 North Road, Yakamia, particularly the northern one third portion, from 'Future Urban Residential' to '**Environmental Conservation Reserve**'.  
**Reasons:** To preserve rare and threatened wildlife species which inhabit this area, particularly critically-endangered Western Ring Tail Possums and endangered Black Cockatoos. To allow Yakamia and other Albany residents to continue to use this bushland for passive recreation purposes.
- Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.
- Abide by the intent, objectives and actions outlined in the adopted City of Albany Local Planning Strategy 2019 which places a heavy emphasis on the need for conservation of native vegetation when addressing land use matters within the City of Albany, including Action 5 under Urban Growth which states: '**There is a presumption against clearing for urban development.**'
- Comply with the City's Climate Change Action Declaration to reduce carbon emissions by preserving carbon-absorbing bushland on Lot 4743 which may be able to be used to offset the City's ongoing carbon emissions from projects such as road building.

**Petition to the City of Albany Councillors, CEO and Staff**

**Amend Yakamia/Lange Structure Plan to preserve vital wildlife habitat  
and carbon-absorbing native vegetation**

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors, CEO and staff enact the following:-

1. Amend the Yakamia / Lange Structure Plan to re-zone as much bushland as possible on Lot 4743, 102 North Road, Yakamia, particularly the northern one third portion, from 'Future Urban Residential' to '**Environmental Conservation Reserve**'.

**Reasons:** To preserve rare and threatened wildlife species which inhabit this area, particularly critically-endangered Western Ring Tail Possums and endangered Black Cockatoos. To allow Yakamia and other Albany residents to continue to use this bushland for passive recreation purposes.

2. Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.
3. Abide by the intent, objectives and actions outlined in the adopted City of Albany Local Planning Strategy 2019 which places a heavy emphasis on the need for conservation of native vegetation when addressing land use matters within the City of Albany, including Action 5 under Urban Growth which states: '**There is a presumption against clearing for urban development.**'

## Petition to the City of Albany Councillors, CEO and Staff

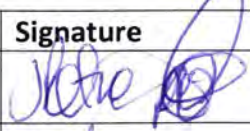

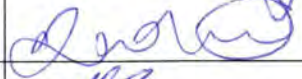

### Amend Yakamia/Lange Structure Plan to preserve vital wildlife habitat and carbon-absorbing native vegetation

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors, CEO and staff enact the following:-

1. Amend the Yakamia / Lange Structure Plan to re-zone as much bushland as possible on Lot 4743, 102 North Road, Yakamia, particularly the northern one third portion, from 'Future Urban Residential' to '**Environmental Conservation Reserve**'.

**Reasons:** To preserve rare and threatened wildlife species which inhabit this area, particularly critically-endangered Western Ring Tail Possums and endangered Black Cockatoos. To allow Yakamia and other Albany residents to continue to use this bushland for passive recreation purposes.

2. Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.
3. Abide by the intent, objectives and actions outlined in the adopted City of Albany Local Planning Strategy 2019 which places a heavy emphasis on the need for conservation of native vegetation when addressing land use matters within the City of Albany, including Action 5 under Urban Growth which states: '**There is a presumption against clearing for urban development.**'
4. Comply with the City's Climate Change Action Declaration to reduce carbon emissions by preserving carbon-absorbing bushland on Lot 4743 which may be able to be used to offset the City's ongoing carbon emissions from projects such as road building.

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors, CEO and staff enact the following:-

1. Amend the Yakamia / Lange Structure Plan to re-zone as much bushland as possible on Lot 4743, 102 North Road, Yakamia, particularly the northern one third portion, from 'Future Urban Residential' to '**Environmental Conservation Reserve**'.  
**Reasons:** To preserve rare and threatened wildlife species which inhabit this area, particularly critically-endangered Western Ring Tail Possums and endangered Black Cockatoos. To allow Yakamia and other Albany residents to continue to use this bushland for passive recreation purposes.
2. Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.
3. Abide by the intent, objectives and actions outlined in the adopted City of Albany Local Planning Strategy 2019 which places a heavy emphasis on the need for conservation of native vegetation when addressing land use matters within the City of Albany, including Action 5 under Urban Growth which states:  
**'There is a presumption against clearing for urban development.'**
4. Comply with the City's Climate Change Action Declaration to reduce carbon emissions by preserving carbon-absorbing bushland on Lot 4743 which may be able to be used to offset the City's ongoing carbon emissions from projects such as road building.

### Amend Yakamia/Lange Structure Plan to preserve vital wildlife habitat and carbon-absorbing native vegetation

We, the undersigned Albany residents and ratepayers, request that the City of Albany councillors, CEO and staff enact the following:-

1. Amend the Yakamia / Lange Structure Plan to re-zone as much bushland as possible on Lot 4743, 102 North Road, Yakamia, particularly the northern one third portion, from 'Future Urban Residential' to '**Environmental Conservation Reserve**'.  
**Reasons:** To preserve rare and threatened wildlife species which inhabit this area, particularly critically-endangered Western Ring Tail Possums and endangered Black Cockatoos. To allow Yakamia and other Albany residents to continue to use this bushland for passive recreation purposes.
2. Rescind the sections of the motion passed at the 21 June 2022 Ordinary Council Meeting for agenda item CCS438 – Proposed Road Reserve, so that none of the City-managed land on Lot 4743, 102 North Road, Yakamia is cleared or ceded to help the developer make his subdivision viable on Lot 420, 58 Sydney Street, Yakamia.
3. Abide by the intent, objectives and actions outlined in the adopted City of Albany Local Planning Strategy 2019 which places a heavy emphasis on the need for conservation of native vegetation when addressing land use matters within the City of Albany, including Action 5 under Urban Growth which states:  
**'There is a presumption against clearing for urban development.'**
4. Comply with the City's Climate Change Action Declaration to reduce carbon emissions by preserving carbon-absorbing bushland on Lot 4743 which may be able to be used to offset the City's ongoing carbon emissions from projects such as road building.
