

WHERE DO I PUT STEEL AND

SCRAP METAL?

ONLY steel and aluminum cans, and clean foil rolled into a ball of at least 5cm should go in your yellow-lidded kerbside Recycling bin.

Please DO NOT put other metal items in your Recycling bin, as they can damage machinery in the recycling facility and pose a hazard to staff.

Other metals items like saucepans, washing machines, and even stainless steel appliances can be dropped off for no charge at the Hanrahan Road Waste Facility or other scrap metal recyclers.

For more information on what goes into your Recycling bin, visit www.albany.wa.gov.au/waste or call the Waste Team on 6820 3000
